BUILT FOR COMFORT

A photograph of two workers from the waist down, walking on a light-colored concrete surface. They are wearing blue denim jeans with black knee patches and black safety boots. The background is slightly blurred, showing a construction or industrial setting with some equipment.

Established in Sydney by Mr Robert Adcock, KingGee has been part of Australian history since 1926. The original KingGee overall was born out of humble beginnings and was the first in a long line of work garments known for their quality and careful craftsmanship.

Over the years, KingGee has evolved with the changing needs of the work environment. Today, our passion and expertise are second to none.

Our premium products are engineered to ensure comfort, durability and functionality enabling you to work at your best in all conditions. We lead the industrial workwear industry and push the boundaries of footwear development to new levels. Quantum and ProCool are just two of our latest innovations.

We have come a long way since our first KingGee overall. Some things never change — we are proud of our product. We are proud of our customer. We believe in comfort.

QUANTUM

QUANTUM - The future of hybrid safety is here.

A world first in safety boots, Quantum is light years ahead in function and design.

Engineered with HYBRID safety, each step fights fatigue and maximises energy rebound, whether on the worksite, the warehouse or anywhere in between. The Cordura® collar wraps the ankle for added protection and comfort, with D30® built into the medial and lateral acting as a shock absorber for high impact resistance. Kulkote® heat mitigating technology coats the NatureTex linings, absorbing heat energy to create a cooling effect.

All this, with 33% recycled materials.

QUANTUM. ANYONE, ANYWHERE, ANYTIME.

HYBRID SAFETY

KULKOTE® TEMPERATURE REGULATING TECHNOLOGY KEEPS THE FOOT COOL AND EXPELS HEAT

D3O® CONSTRUCTION PROVIDES WORLD CLASS SHOCK ABSORBING IMPACT LATERAL & MEDIAL ANKLE PROTECTION

CORDURA® COLLAR GIVES SUPPORT AND STRENGTH WHILE STILL BEING BREATHABLE

NATURETEX LININGS ARE MADE FROM RECYCLED PLASTIC BOTTLES

Relieves pain from working and standing on hard surfaces and rugged worksites

AUSTRALIAN AND NEW ZEALAND SAFETY STANDARD

All certified KingGee protective safety styles, and other footwear that are certified occupational styles, are type tested and manufactured under Product Certification requirements monitored by BSI to ensure that the manufacturing process at each certified facility has the capability to produce certified products in compliance with each product's specified certification features. All testing is conducted by an independent quality registered laboratories both locally and overseas.

Guidance on selection, care and use of safety or protective or occupational footwear may be found at AS/NZS 2210.1:2009 (Safety, protective and occupational footwear - Guide to selection, care and use) and AS 2210.2:2019 (Personal protective equipment - Test methods for footwear (ISO 20344:2011, MOD)).

HOW TO WORK OUT YOUR SHOE SIZE

The grey shaded boxes show the Men's to Women's equivalent sizes for unisex sized footwear.

For example, a Men's AUS/UK 5 is equivalent to a Women's AUS/USA 7.

Please Note: Unisex sizes are wider fits for women than women's specific footwear.

**APODA ENDORSED**

KingGee Footwear and APODA are working together to deliver improved comfort and foot health for all of our end users. Footwear showing this logo have been tried, tested and recommended by experts.

**ARZ+™ PAD TECHNOLOGY**

Anatomical Rebound Zone (ARZ+) with an expandable polymer that provides excellent cushioning and rebound. ARZ+ heel protection difference is apparent at heel strike the soft contouring material dissipates force upon impact.

**GENUINE LEATHER**

KingGee boots are made using the finest quality leathers that mould to the shape of your feet allowing your feet to "breathe".

**OIL & SLIP RESISTANT**

Sole resistant to fuel oil and rated to SRA slip resistance which is tested using water on ceramic tile.

**WATER RESISTANT**

Water resistant footwear will repel water so that it soaks in more slowly and are best used when walking through dew or occasionally damp areas.

**SUSTAINABLE FOOTWEAR**

We use Global Recycled Standard (GRS) endorsed recycled TPU materials. When you shop from this range, you're helping us work towards a more sustainable future.

**COMPOSITE TOE CAP**

Composite safety toe caps provide the same level of protection as that afforded by steel toe caps tested under AS/NZS 2210.3:2009 (200 Joules) or AS 2210.3:2019 standards, with the added benefit of being non-conductive and are up to 30% lighter than a steel toe cap.

**HAND MADE**

This shoe is made by hand using quality materials and time-honoured traditional shoe making skills.

**PROTECTIVE TPU TOE BUMPER**

Protective Thermoplastic Polyurethane (TPU) toe and heel bumpers provide further abrasion resistance.

**WELLMAX® PUNCTURE PROTECTION**

WELLMAX® anti-penetration is a non-metallic, flexible plate Tested and compliant with EN ISO 20345, EN12568 and CSA Z195-02 Standards. The high tech ceramic coated fibres offer greater comfort, lightness, thermal insulating properties and flexibility compared to steel plates.

**ACHILLES FLEX**

Accordion-style flex point in the Achilles area allows the boot to flex. It's unique design allows the foot to flex forward when crouching and backward when changing gears in a car/truck preventing any pain and restriction in movement from the Achilles tendon.

**COMPRESSION MOLDED EVA (CME)**

Provides energy rebound with every step. Essential for those who cover a high amount of kilometres on hard surfaces, acting as a shock absorber while still being lightweight.

**LIGHTWEIGHT**

KingGee footwear incorporate safety toe caps in a contemporary yet durable design which feels lightweight on the wearer's foot.

**RUBBER OUTSOLE**

Rubber offers 300° Celsius (572°F) heat resistance. Rubber has excellent resistance to oils, acids and is naturally resistant to hydrolysis.

**WOMEN'S SPECIFIC FIT**

Genuine women's fit.

**AIRPORT FRIENDLY**

Airport friendly boots feature non-metallic components. Plastic shanks are used in manufacture together with the use of a composite safety cap ensure KingGee footwear meets AS/ NZS 2210.3:2009 or AS 2210.3:2019 safety standards.

**DUAL DENSITY PU/TPU OUTSOLE**

Polyurethane (PU) provides an excellent balance of shock absorption (cushioning) and energy return (rebound). Thermoplastic Polyurethane (TPU) has many useful properties including elasticity and resistance to most oil, grease and abrasion, as well as 130° Celsius heat resistance.

**MEMORY FOAM FOOTBED**

Sensitive to pressure and moulds perfectly around the contours of your foot. The PU bottom layer provides permanent cushioning and shock absorption.

**STEEL CAP**

Designed to withstand a force of 200J (Joules) and compression resistance of 1.5 ton. Ethylene Vinyl Acetate (EVA) protective cap liner for added comfort and steel cap protective liner to ensure toes are comfortable and not in contact with the protective safety cap.

**ANTI-STATIC**

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gasses.

**ELECTRICAL HAZARD EH**

Electrical hazard footwear is specifically designed and tested to insulate the wearer from electrical hazards, to reduce the flow of electricity. EH Footwear has been tested to the requirements of ASTM F2413-11. EH shoes should not be used as the primary source of protection in an electrical hazard environment.

**MET GUARD**

Poron™ XRD™ Extreme Impact Protection material is a breakthrough technology. Extreme impact protection from a moulded pad stretching from the tongue to the steel cap. Contoured, breathable and flexible allowing ease of motion for comfort & fit whilst protecting the metatarsal. Tested in accordance to ASTM F 2413-11.

**SRC SLIP RESISTANCE**

SRC offers the most superior slip resistance for all surfaces. (Tested on both ceramic tile floor with SLS solution and steel floor with glycerol).

AGION®

Agion® branded antimicrobial technology makes products cleaner and longer lasting with silver, copper and zinc, which have been proven in use throughout history. Agion® anti-microbial technology provides built in protection by working 24/7 resisting the growth of microbes.

COSMO™

- Highly abrasion resistant lining
- Keeps you dry and comfortable
- Quick drying hi-tech

KULKOTE®
TEMPERATURE
REGULATING

Technology keeps the foot cool and expels heat.

BOA®

The Boa® Fit System is comprised of three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. Each configuration is engineered to optimize fit and provide precision, adaptability and control.

D30®
CONSTRUCTION

Provides world class shock absorbing impact lateral & medial ankle protection.

NATURETEX
LININGS

Made from recycled plastic bottles.

BENCHMARK®
All KingGee footwear

showing this logo is certified to AS/NZS 2210.3:2009 meeting all Benchmark® requirements under the Australian and New Zealand standards.

DRI-LEX® LINING

Dri-Lex® lining treated with Aegis® anti-microbial. A patented superior mesh designed to manage moisture within a boot environment.

- Wicks away moisture
- Allows your feet to breathe
- Keeps your feet dry
- Keeps your feet cool

PORON™ XRD™

Extreme impact protection pad is durable, lightweight and comfortable. Poron™ XRD™ is designed to withstand multiple hits over time and not break down.

CORDURA®
COLLAR

Gives support and strength while still being breathable.

KEVLAR®
DuPont™ Kevlar® aramid

fibre is used due to it being lightweight, heat resistant and extraordinarily strong, with 5 times the strength of steel on an equal-weight basis. It is about 2.5 times stronger than nylon and polyester, has almost no stretch, does not melt, and decomposes at 800°F.

YKK®
World leader in the

manufacture of fastening systems. YKK® Coil zipper is extremely strong and lightweight, has excellent heat resistance (up to 360°F/ 182°C) and resistance to cold (down to -60°F/ -51°C). Resistance to chemicals further extends the use of YKK® beyond the scope of conventional metal zippers.
