## POLY COTTON END ON END

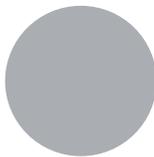

End-on-end is a poplin weave in which the threads of one colour crosses over the threads of another colour. This fabric appears to be a true solid colour from a distance, but it has more dimension up-close thus adding variety to the dress shirt. Strong, durable, easy care, and wrinkle resistant fabric makes it perfect for a great business or dress shirt.

‘Our Focus Is You’

**It is the subtle details, through style and design, which create a lasting impression. The turn of a cuff, the fit of a jacket, the silhouette of a dress - together they tell the narrative of your brand.**

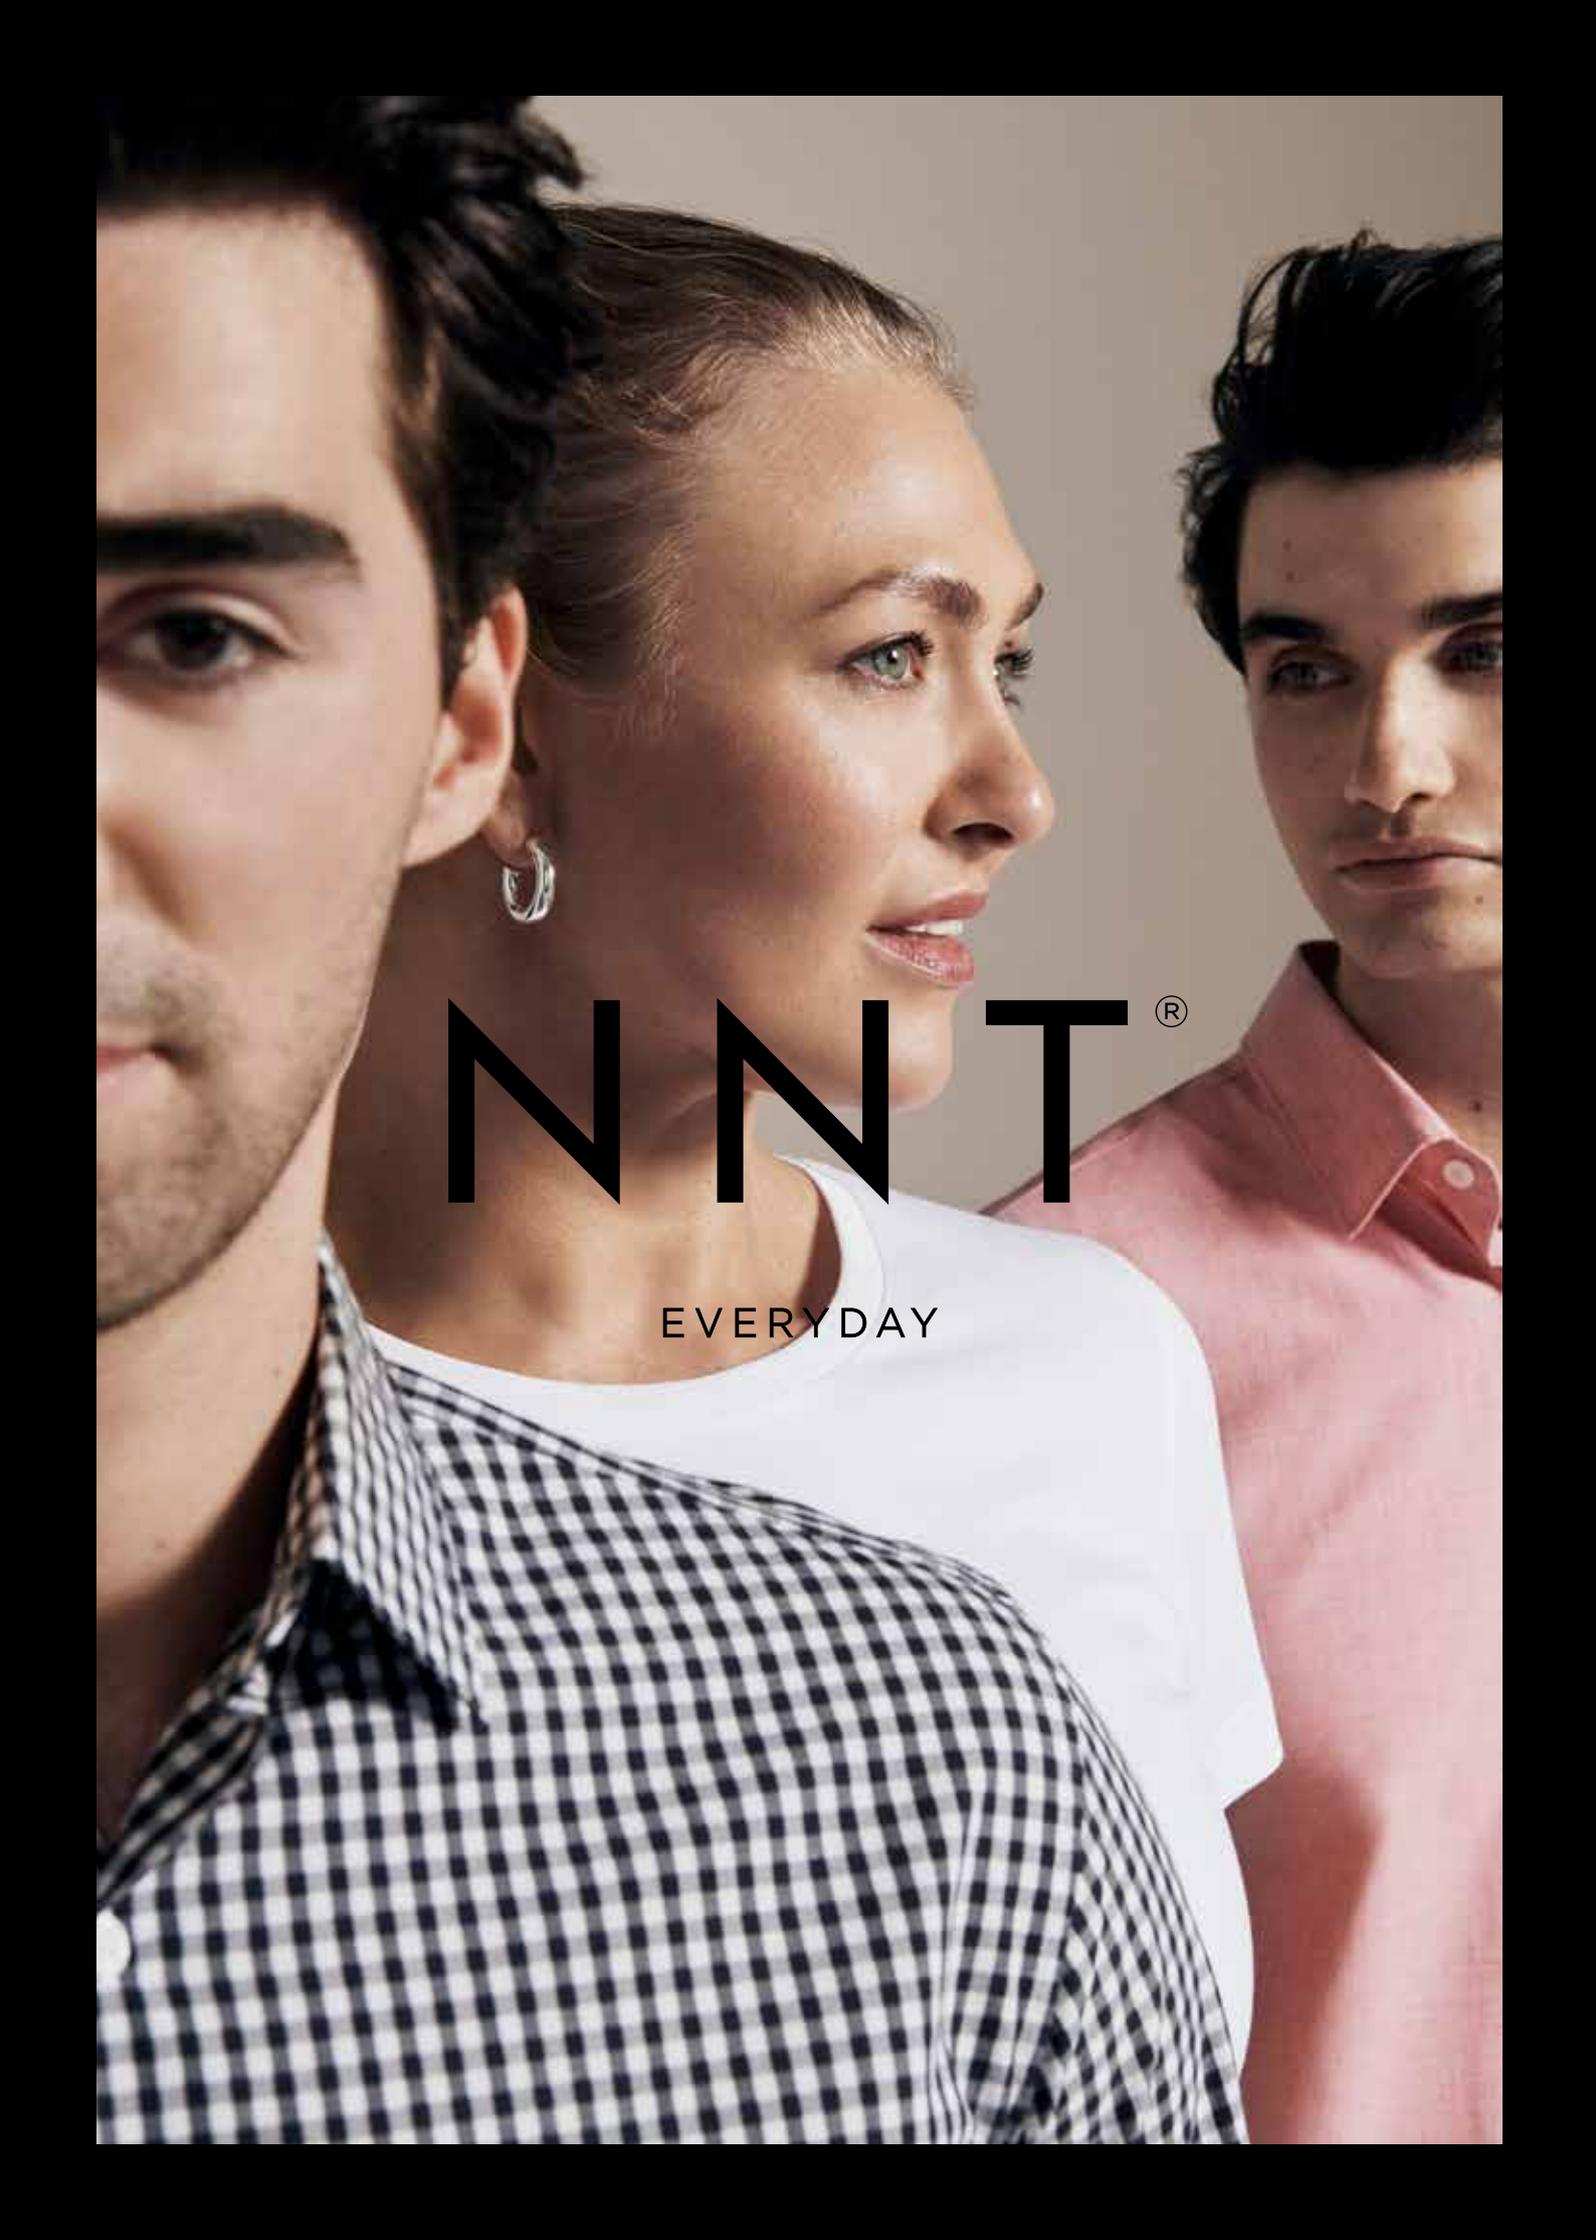

In this NNT range, we have continued to deliver on our promise to innovate. We have introduced new fabrics, features and designs that will compliment your current wardrobe and add an extra layer of diversity to your style. Not only will you look good in your uniform, we have created apparel that is designed to endure your everyday tasks, using fabrics that are easy to maintain, and still look as it did the day you received it after it has been washed.

We have been able to create this range for you, with you in mind, by enlisting the vast knowledge and experience of our in-house designers, fabric technicians, sourcing teams, and a thorough auditing process done internally and by an independent body. In fact, our very own team members trial your clothes, because if we wouldn't wear it, then why would you?

We take great pride in creating every piece that may hang in your wardrobe and we take extra care to ensure we comply with ethical sourcing practices and policies, so you can be confident that you are doing your bit for sustainability.

This season, we encourage you to feel confident with bold colours, experiment with new textures and dress yourself with pride, every day.
